As Mayor of Cut Bank, I wish to encourage the Committee on Long Range Planning to give this bill full support. The City of Cut Bank was ranked 55 on the funding list and only 52 projects were funded. The City has worked for the past three years developing a long-range plan to replace the existing water distribution system which was built in 1914. Receiving this funding is crucial to supporting our plan to replace the entire distribution system over the next 10 years. I would like this comment to be included as part of the official hearing record. Thank you.
